Bird Feeder Tour Jan 20 2019

Birding 101 ---that's about how many birds we saw on our tour of Uxbridge and Brock countryside. Nineteen species (Brenda saw a Shrike on her way from Zephyr to us! Paul, Genny and I saw a Raven at USS) Carol and Doug anything to add? Anyone see something on the way home?

What a great day! Garry and Mhairi greeted us with coffee and tea and a backyard hopping with birds. We put about 12 species on the list right away. Then off to Hedgerow farms where Neil had put food out all around the house in a variety of feeders. We did a walk about the property in hopes of spotting waxwings and as we were leaving Paul and Genny spotted a small flock . Unfortunately too quick to ID which type of waxwings. On to Margarets place and incredible muffins with rhubarb mmmmm. Redpolls yeah another species . Fond memories of Paul entertaining us and seeing the Barred owl here two years back. South to Zephyr and Brenda' and Neal's home. More redpolls – energy efficient house solar panels geothermal, bird protection film on windows like Carols . More goodies ...gaining weight and species.Off south again to Roseville and Caroline and Jim's place . Homemade soup and fresh made sourdough bread. Whose said this was all about birds !

Eighteen Species and Hundred and one individual birds and six happy bird tourers . A cold day but full of sunshine . Thanks to Garry, Neil , Margaret, Brenda, and Caroline and their helpers for opening your gates and doors and sharing your bird stories with us along with the goodies of course!

Next year we head south and east Glen Major, Chalk Lake, Utica what do feeders in the winter look like there?
